

Pay attention in work zones!

More than 1 crash occurs in an Oregon road work zone every day

Everyone deserves to be safe at their place of work. We need your help to keep workers safe in *their* place of work — road construction zones. Inattentive drivers are the most common cause of work zone crashes.

Orange is your clue to slow down and look for workers!

When you see orange signs, barrels or cones, slow down and watch for workers. Fines double in a work zone with or without workers present.

One traffic death is too many

Drive to Zero focuses on reducing injuries and fatalities on our roadways. Our goal is to reduce fatal and serious injury crashes by half by 2022. For information on being a safer driver, visit drivetozero.org.
