

# Seeds for Sharing Gladstone Library

## DISCLAIMER

Many seeds shared by this Seed Library were grown by community members with love and care like our ancestors have done for thousands of years. Please know they may not meet state germination or labeling standards.

The Seeds for Sharing Library cannot guarantee the germination rates or purity of the seeds provided. Seed saving and gardening carry an element of chance. If you should check out seed that doesn't come true, please let us know by sending an email to the library

Most of our seed has been donated by seed companies and we keep it until it reaches its expiration date. It is not for resale.

We do not knowingly accept or share any seeds that are chemically treated, patented, or genetically modified.

## SEED GARDEN

We have a seed garden at New Urban High School, 1901 SE Oak Grove Blvd. You can volunteer any Thursday between 8:00 am and noon. For more information:

Facebook: Seeds for Sharing Library and Garden

Facebook: Gladstone Library

## ABBREVIATIONS

**AoT** = Ark of Taste variety; Slow Food Movement

**CAV** = Climate Adapting Variety aka Modern Landrace/Grex

**F1** = hybrid. Do not save seeds from plants you grow with these seeds. They will not produce the same plant.

**L** = Locally-grown seed

**OSSI** = Open Source Seed Initiative. OSSI was created by a group of plant breeders, farmers, seed companies, and sustainability advocates who want to free the seed! OSSI works with plant breeders who commit to making one or more of their varieties available exclusively under the OSSI Pledge. If you see OSSI in a listing, see the "pledge" in the next paragraph

## OSSI Pledge:

You have the freedom to use these OSSI-Pledged seeds in any way you choose. In return, you pledge not to restrict others' use of these seeds or their derivatives by patents or other means, and to include this Pledge with any transfer of these seeds or their derivatives.

This "copyleft" commitment ensures that the Pledge is transmitted with any further distribution of the seed or the seed of any new varieties bred from it. In this way, OSSI preserves the unencumbered exchange of plant germplasm for breeding purposes and guarantees the rights of farmers and gardeners to save and replant seed.

For more information about the Open Source Seed Initiative, see [www.osseeds.org](http://www.osseeds.org)

## HELPFUL GARDENING CALENDARS & GUIDES

### Portland Nursery Vegetable Calendar

### Please save seeds for the library!

**The best seeds are your locally grown seeds.** The more times you plant, save seed, and plant again, the more adapted the seed is to our changing environment. There is a Seed Saving Check-in form available:

- On top of the seed cabinet at the library
- Last page of this document – print, cut it apart and complete it

Please turn in your seeds and check-in form to the front desk at the library.

### Alphabetical by Common Plant Name

Scientific Name	Plant	Portland Plant List	Stratification	Scarification	Plant in F=Fall, W=Winter, Sp=Spring, Su=Summer	Where	Cover Seeds	Ht.	Comments
<i>Geum macrophyllum</i> (large-leaved avens)	Avens	PPL	unknown – none to 90 days	No	F, early Sp	Sun/Part shade	shallow , cover lightly	2'	Likely some stratification or a longer period of cool temps will enhance germination. Plants will not germinate until temps warm in spring. In pots and in situ - small pinch.
<i>Agrostis exarata</i> (spike bentgrass)	Bentgrass	PPL	No	No	F, Sp	Sun/Part shade	1/8"	10"	Seed heads 2 ft. Can be fall or spring sown. Cool temps enhance germination, if spring sowing, earlier is better. Fall sown seed will have increased likelihood of flowering the first spring. Spring sown seed may not flower until second growing season. In pots, and in situ small pinch
<i>Gilia capitata</i>	Blue field Gilia	PPL	short, if any	No		Sun/Part shade		12-36"	Annual. Cool temps enhance germination.
<i>Collinsia grandiflora</i> (large flowered blue-eyed Mary)	Blue-eyed Mary	PPL	No	No	late F, early Sp	Part sun		16"	Tolerates sun but is best in part shade. Habitat: Upland meadows and prairies, rocky areas, woodland edges.
<i>Ranunculus occidentalis</i> (western buttercup)	Buttercup	PPL	short, if any, possibly 2 wks	No	F	Full sun		.5-2'	Habitat: most often associated with moist prairies and meadows but can be found in a variety of habitats with adequate seasonal moisture.
<i>Camassia quamash</i>	Camas, Common	PPL(L)	12 weeks	No	mid-late Sp	Sun	1/8 - 1/4"	2'	Plant 5-7 seeds. Best to plant in fall to assure required stratification. If stratifying in fridge plant out in early spring so seeds can be exposed to cool temps. Seedlings look a lot like grass
<i>Camassia leichtlinii</i>	Camas, Great	PPL	12 weeks	No	mid-late Sp	Sun/Part shade	1/8 - 1/4"	3'	Plant 5-7 seeds. Best to plant in fall to assure required stratification. If stratifying in fridge plant out in early spring so seeds can be exposed to cool temps. Seedlings look a lot like grass
<i>Aquilegia formosa</i> (western columbine)	Columbine, Red or Western	PPL(L)	5 days? 60-90 days?		F to late W	Full sun/part shade		2-3'	Needs moist, well-drained soil.
<i>Echinacea purpurea</i>	Coneflower, Purple	(L)	No	No	F, Sp	Full sun/part sun		40"	
<i>Clarkia rhomboidea</i>	Diamond Clarkia	PPL	No	No	F, Early Sp	Full sun		2'	Habitat: woodland and forest edges and openings, meadows and open areas. Often in dry, rocky habitats. Handles dry soils well.

## Seeds for Sharing Gladstone Library

(L) = Locally grown seed

### Natives

### Alphabetical by Common Plant Name

Scientific Name	Plant	Portland Plant List	Stratification	Scarification	Plant in F=Fall, W=Winter, Sp=Spring, Su=Summer	Where	Cover Seeds	Ht.	Comments
<i>Dowlingia elegans</i>	Elegant Calicoflower		No			full sun to part shade		12"	Habitat: vernal pools, bogs, fens, naturally moist areas.
<i>Clarkia amonena</i>	Farewell-to-Spring		Short, if any			Sun		2-3'	Cool temps may enhance germination. Habitat: Moist meadows to open drier sites.
<i>Ligusticum apiifolium</i> (celery-leaved lovage or licorice-root)	Lovage	PPL	exact unknown but likely 10 to 12 weeks	No	F	Sun/shade	shallow, cover lightly	2-4"	Plant in the fall or stratify in the fridge. Fall planting outside is recommended. Germination can be sporadic. Fall seed sown outside may not germinate until temperatures warm in spring. In pots and in situ – small pinch
<i>Lupinus polyphyllus</i>	Lupine, Bigleaf	PPL	short	yes, if Sp planted	F, early Sp	Sun	1/8 to 1/4"	3 – 4'	Germination is affected by both temperature and scarification. If fall planting mother nature will take care of both. If spring planting you must scarify and then make sure the seed is exposed to cool temps so EARLY spring is best.
<i>Lupinus latifolius</i>	Lupine, Broadleaf	PPL	short	yes, if Sp planted	F, early Sp	Sun	1/4 - 1/2"	1 – 2'	Germination is affected by both temperature and scarification. If fall planting mother nature will take care of both. If spring planting you must scarify and then make sure the seed is exposed to cool temps so EARLY spring is best.
<i>Lupinus rivularis</i>	Lupine, River	PPL	short	yes, if Sp planted	F, early Sp	Sun	1/8 to 1/4"	3-4'	Germination is affected by both temperature and scarification. If fall planting mother nature will take care of both. If spring planting you must scarify and then make sure the seed is exposed to cool temps so EARLY spring is best.
<i>Asclepias speciosa</i>	Milkweed (Showy)		No	No	F, W, Sp	Sun		3-4'	Habitat: open, dry to moist sites. Appreciates good drainage. Germinates easily with average spring temperatures. Spreads by rhizomes. Deer resistant. Deciduous.
<i>Allium cernuum</i>	Nodding onion	(L)	60 days	No	F, Sp	Full sun to light shade			Prefers well-drained soil but will tolerate clay soils. It thrives in difficult sites such as hot sun and gravelly soil.
<i>Iris tenax</i>	Oregon Iris	PPL			F, Sp	Sun/Part shade	1/8"	1-2'	Habitat: open, grassy meadows, sandy soils
<i>Eriophyllum lanatum</i>	Oregon Sunshine	PPL	2 weeks	No	F, Sp	Full sun/part shade	surface to 1/4"	1-2'	Cool temps enhance germination so if spring sowing early is best. While seedlings need moisture, they are prone to damping off. Do not overwater. In pots and in situ - small pinch

## Seeds for Sharing Gladstone Library

(L) = Locally grown seed

### Natives

### Alphabetical by Common Plant Name

Scientific Name	Plant	Portland Plant List	Stratification	Scarification	Plant in F=Fall, W=Winter, Sp=Spring, Su=Summer	Where	Cover Seeds	Ht.	Comments
Anaphalis margaritacea	Pearly Everlasting	(L)	No	No	F	Full sun/part sun	No	20"	
Plaglobothrys figuratus	Popcorn Flower (Fragrant)		No	No	F	Full sun		4-12"	Habitat: vernal pools, wetlands, bogs, fens, naturally moist areas. Moist fields and open meadows.
Rupertia physodes	Scurf Pea	PPL	short	yes, if Sp planted	F, early Sp	Sun/Part shade	1/4"	to 2'	Information is conflicting, however in Willamette Valley it has been shown to germinate with little to no stratification IF SCARIFIED. If not scarifying then fall planting is recommended. In pots and in situ - 3-5 seeds
Plectritis congesta	Seablush, Rosy plectritis		Short, if any			Sun to partial shade		6-20"	Cool temps may enhance germination. Habitat: moist prairies to open upland sites. Considered drought tolerant.
Prunella vulgaris var. lanceolata (self-heal)	Self-Heal	PPL	No	No	F, W, Sp, Su	Sun/Part shade	Lightly	6-20"	Can be fall or spring sown. Fall, winter sown seed may flower the following spring. If spring sowing, early spring. In pots, and in situ sow 5 – 7 seeds.
Carex obnupta	Slough Sedge	(L)	About 45 days			Sun to shade		2-3'	Habitat: boggy areas to standing water in forests, woodlands, meadows, and along rivers, streams and lakes
Spiraea betulifolia	Spirea, Birch-Leaf	PPL	No, or 60 days			Sun	surface sow		Satisfactory germination occurs without stratification.
Viola praemorsa (canary violet)	Violet	PPL	12 weeks	No	F	Full sun	shallow to 1/8"	6-20"	Can be naturally or fridge stratified. Young plants go dormant early their first season, but put on a lot of growth their second. In pots and in situ - 5-10 seeds
Verbena hastata	Wild Hyssop, Swamp Verbena	(L)	4 wks	No	F	Full sun/part sun		2-5'	Sand to clay soil; water needs - medium to moist
Grindelia integrifolia	Willamette Valley gumweed	PPL	No	No	F, W, Sp	Sun	Lightly	12-30"	Cool temps enhance germination, so early spring planting is best. Spring sown should germinate within 3-4 weeks. In pots, and in situ sow 5 – 7 seeds.
Achillea millefolium	Yarrow	PPL(L)	No			Sun/Part shade		10-36"	Habitat: Varied; open moist prairies to dry hillsides.
Mimulus guttatus	Yellow Monkey-flower	PPL	No?	No	F, W, Sp	Sun/Part shade	No	12-24"	Keep soil moist after sowing. In pots, and in situ sow very small pinch.

### Climate Adapting Variety (CAV) - Modern Landraces & Grex

These varieties are now integrated with the other varieties, but flagged with a special orange divider.

Plant	Variety
Bean garbanzo	Lofthouse Landrace Garbanzo (L)
Beet	Three Root Grex (L)
Collard	Ultracross Collard (L)
Corn, Sweet	Astronomy Domine (L)
Dill	Landrace Mixed Varieties (L)
Flax	Lofthouse Landrace (L)
Lentils	Lofthouse Landrace Lentils (L)
Melon	Lofthouse Green Landrace Lofthouse Special Muskmelon XL (L)
Parsley	Hungarian-German Landrace (L)
Pepper sweet	New Urban Perfect Italian (L)
Squash, Winter	Clackamas Maxima Squash (L) Lofthouse Landrace Maxima (L) Lofthouse Landrace Moschata (L) (OSSI)
Sunflower	Lofthouse Mammoth XL (L) SRSC Mammoth Landrace (L)

Landrace is a locally-adapted, genetically-diverse, promiscuously-pollinated, survival of the fittest crop that fosters food security and community. It is a blend of many varieties and has incredible vigor. It is highly adaptable to a changing growing environment.

### Advantages

- Adaptability – more easily adapts to a changing growing environment than heirlooms, open pollinated, and hybrid varieties
- Easy seed saving – you don't have to worry about it crossing with another variety. Crossing is a good thing in a grex or landrace.
- Community – the more we share our grex and landrace seeds with each other, the more genetic diversity we achieve as a community.

### Creating your own landrace

- Interplant as many different varieties of the same species as you can.
- If you like the taste of the produce, save seed from it and replant as many different varieties as you can next year
- Do not save seed from weak or diseased plants; only save seed from your best plants
- Give the library some of your seeds so your community can use it
