Acute and chronic pain affects more than 100 million Americans and is a burden on everyday life.

Older adult community residents, those who work with older adults, medical providers, physical therapists, and senior center representatives are encouraged to attend this public event.

Keynote:

- Understanding pain
- Acute vs. chronic pain

Panel Topics:

- Opioid tolerance and addiction
- Marijuana and buprenorphine for pain
- Pain management strategies
- Stigma associated with opioid use
- Using opioids safely
- Safe storage and disposal of prescription medication
