<b>Counsel Review</b>	Counsel reviewed/approved transaction method on 10/3/2019.
<b>Contact Person</b>	Chris Fricke <a href="mailto:CFricke@clackamas.us">CFricke@clackamas.us</a> 503-723-4941

#### **BACKGROUND:**

Clackamas County Technology Services began uses ExaGrid for its back-up data storage. TS manages and expands it as needed to keep up with our growing needs. We are currently at approximately 80% of available capacity and project to run out in the near future. As such, there is presently a need to further expand back-up storage capacity and extend the annual support and maintenance for five years – the amount of time that we can reasonably plan to continue using this technology.

#### Procurement Process

Technology Services staff obtained four (4) quotes from vendors for the exact same ExaGrid capacity and services. The quotes ranged \$153,858.50 (from CDW-G) to \$293,296.88. Three of the quotes, including the lowest cost quote, were under contracts that meet the requirements of Permissive Cooperative Procurements under LCRB Rule C-046-0430. By obtaining multiple quotes and taking advantage of a special pricing offer under a cooperative contract, Technology Services was able to realize substantial cost savings for the County.

County Counsel has reviewed and approved the cooperative contract and this transaction.

**RECOMMENDATION:**

Staff recommends the Board of County Commissioners approve the purchase of additional ExaGrid back-up storage and annual maintenance and support from CDW-G by executing a Purchase Order according to the State of Oregon Cooperative "IT Hardware VAR Contract (5603).

Respectfully submitted,

Director
