

## RIVER STAFF GAUGES IN UPPER SANDY RIVER BASIN

The National Weather Service and Clackamas County have installed three staff gauges in the upper Sandy basin to help with monitoring river conditions during high water.

1. Salmon River Bridge on Brightwood Loop Road  
Elevation 1035 feet

2. Sandy River Bridge on Brightwood Bridge Road  
Elevation 1070 feet

3. Sandy River Bridge on E Lolo Pass Road near Zigzag  
Elevation 1440 feet

# Tracking Online River Gauge Levels in the Upper Sandy Basin

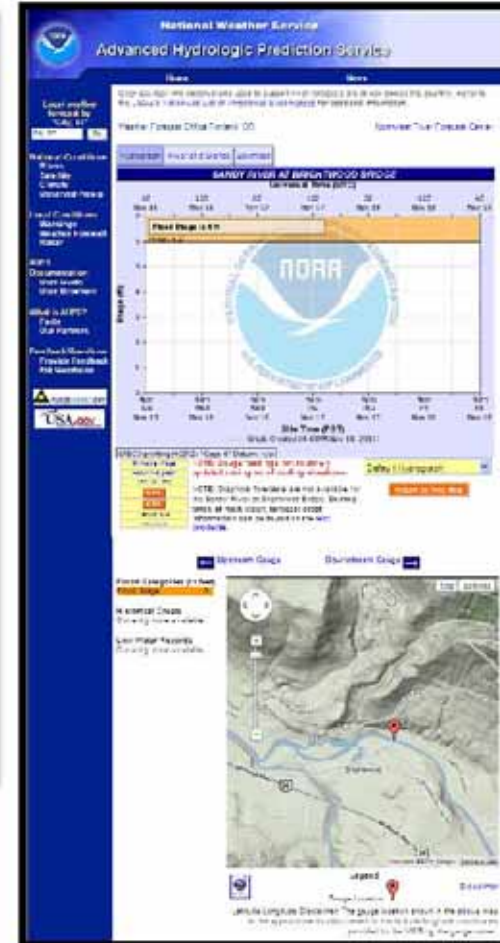

National Weather Service – Portland [www.wrh.noaa.gov/pqr/](http://www.wrh.noaa.gov/pqr/)

Go to the NWS Portland web page and click on the “Rivers and Lakes Tab

Look for the Sandy River icon on the map or select the pull down tab in the left-hand column

View the river level during periods of high water

Be prepared to take necessary action if there is a potential for flooding in your area.
