Steering Committee Meeting

8-14-17
2:00-4:00pm
Attendees: Chris Hoy, Shelly Mead, Mary Rumbaugh, Angela Trimble, Brenda Durbin, Nicki Turk, Abby Ahern, Erin Skinner

Coordinated Housing Access Waitlist Analysis

The group reviewed the 2015-2017 data.
- There are some errors in the data. Still some cleanup to be done.
- There are some assumptions made: We are assuming that the household "need" is the highest program they qualify for.
- Of the 109 on the emergency shelter waitlist – many of those people just have not been updated to be removed from the list.
- Permanent Supportive Housing (PSH) historically was not allowed to serve families.
- PSH inventory has very little movement

Program Criteria Notes:
- If we focus attention on chronically homeless, we will not be able to end homelessness very quickly. Need a balanced system.
- First time homelessness.
- Continue asking about cost efficiency, but not scoring on it.
- Also ask about leveraging other funds but not necessarily scoring based on this.
- Look at the percentage of the population that qualify for PSH & RRH and come up with a formula to add new beds in those categories.
- Benchmark that new programs must meet: HMIS, success in a complicated federal grant, administrative capacity.
- Cultural specificity, look at the recent PIT. How are people addressing the data?

Final criteria below

Steering Committee Meeting

Criteria For All HUD CoC Program Applications

Program Criteria:

1. Vulnerability of pop aka CH (weighed against cost efficiency)
   a. Disabilities
   b. CH
   c. Families with Children
   d. DV
2. Ranking of points for program component type based on analysis of CHA (PSH, RRH, TH, RRH/TH)
   a. 20% of funding to RRH
   b. 80% of funding to PSH
   c. Balance between vulnerability/CH and those who are newly homeless
3. HUD priorities
   a. Dedicated CH beds
   b. Increases overall RRH beds
4. Performance of renewal applications
   a. Permanent housing placements at exit (or stayers for PSH)
   b. Increased income
   c. Bed Utilization
5. Administrative capacity/HMIS (or other data tracking) experience/documented success with federal grants
6. Experience working with homeless populations
7. Effectiveness in working with populations of color and/or other marginalized groups

Not Scored, but could come into play in a tie:

8. Cost efficiency (within program and population type)
9. Agency's history of leveraging funds
