It will be the responsibility of potential Quoters to refer daily to the Bids and Contract Information Page (<u>www.clackamas.us/bids/index.html</u>) to check for any available addenda, response to clarifying questions, cancellations or other information pertaining to this RFQ.

All questions regarding this RFQ are to be directed to the Procurement Analyst named above. Quoters may not communicate with County employees or representatives about the RFQ during the procurement process until the Procurement office has notified Quoters of the selected Quoter. Communication in violation of this restriction may result in rejection of a Quoter.

# 2. SCOPE

The purpose of this RFQ is to provide an update to the County's 2011 traffic count program, providing traffic counts of 649 locations throughout Clackamas County. The information will be used to provide critical information to engineering, planning and maintenance staff and the community regarding the existing traffic volume and growth trends on County roadways. The data will be provided on the County's website and will be used to create a County traffic volume map available on the County's website or by hard copy.

# 2.1 <u>GENERAL INFORMATION</u>

This RFQ is intended to solicit a vendor for a contract length of one year with the option for two (2) additional one (1) year renewals.

**A.** Year one (1) will be for the placement of counters and the collection of traffic volume, speed and classifications counts at 674 locations within Clackamas County.

The traffic counts from this project will be used in creating a traffic count map and individual count information will be provided to the public on the County's website.

The budget for this year one task will not exceed \$50,000.

If proposed quote for the scope of work exceeds the allotted County budget for this request, the County will finish a portion of these traffic counts to be determined before the contract is awarded.

**B.** Year two (2) will be for Ongoing Data Collection Services.

This task consists of the services to collect a variety of traffic data for a period of one year.

It will be at the sole discretion of the County if the ongoing Data Collection Services will be needed after the year one services are complete. Should the services be deemed necessary, the Contract may be renewed for two (2) additional one (1) year renewals upon written approval of both parties.

The budget for any Ongoing Data Collection Services will not exceed \$10,000.00 annually.

### 2.2 <u>2017/2018 TRAFFIC COUNT PROGRAM (Year One Services):</u> <u>DESCRIPTION</u>

### A. Data Collection

Place counters at 674 locations as provided on the map at the following URL: <u>http://cmap.clackamas.us/maps/traffic</u>. Enter raw data counts in the attached Count Location List for Contractor Excel spreadsheet under the column titled "**2017/18 unadjusted count**". Place counts as near as possible to historical locations based on the "position" column in the spreadsheet.

Each count must contain at least one full day of data (24 hours minimum, 12:00 AM - 11:59 PM), and shall be collected midweek (Tuesday, Wednesday or Thursday) and not occur during a week containing a federal holiday. No counts shall be collected between November 20, 2017 and January 5, 2018 or between March 26, 2018 and March 30, 2018. All counts shall be completed by July 31, 2018.

Counts should be rescheduled in locations of nearby construction and/or road closures where obvious activity could skew the results of the study. Contractor shall contact the County frequently for a schedule of nearby construction activities. However, the contractor is responsible for ensuring the reliability of the counts.

Generally, the distance of the data collection point from a stop sign or signal should be +/- 200 feet. Other factors to take into account could be major driveways, approach turn lanes, etc. The Contractor shall contact the County for guidance on data collection set up location where the indicated count location may jeopardize the accuracy of the data collection.

Traffic counters should not be placed in locations where standing vehicle queues are expected. In these instances, the Contractor shall contact the County for guidance.

In general, the traffic counters should not be placed near busy intersections and should be as far away as practical from intersection where standing queues could be expected while maintaining the intent of the planned location. In some cases, this may require alternative methods to provide an accurate traffic count. If there is any question about the appropriateness of a count location, contact the County for guidance.

### **B.** Deliverables

Contractor shall provide traffic data in two types of electronic files including RDF (Timemark's VIAS Software) and PDF files. PDF files shall show the VIAS Daily Combined Speed report format in 60-minute increments. PDF reports shall display custom headers that include the official county logo; specific details for the headers will be provided by the County. All files shall

be consistent in appearance. No hard copy files are required. Each file shall contain the following information:

- Location Road being counted north, south, east, or west of nearest street with distance from nearest cross street (+ / -) 100 feet and GPS coordinates of count location.
- Date of count
- Data file name
- Remarks area
- Posted speed
- Tube length
- Hose spacing diagrams
- Title
- Counter ID number
- Weather conditions
- Directional traffic volume (Northbound and Southbound or Eastbound and Westbound)
- Combined volume totals
- Split percentages by direction
- AM peak hours volume by direction
- PM peak hours volume by direction
- One hour increment traffic volumes/speeds by direction
- Speeds in five mile per hour bins
- Speed bin totals
- Percent of total in each bin
- Percentile speeds 10%, 15%, 50%, 85%, 90%
- 10 mile per hour pace
- Number in pace
- Percent in pace
- One hour increment traffic total 12 vehicle classifications including bicycles, cars/trucks, 2-axle long, buses, multiple axle configurations.
- Classification bin totals
- Percent of total in each bin
- Total truck percentage

Provide all items above on a monthly basis through the duration of the project by email to Troy Johnson (<u>troyjoh@clackamas.us</u>) or by other electronic means.

County will review and approve the data. The Contractor shall recount, at no additional expense to the County, counts that do not conform to the methodology described in the scope of work.

Use the following file naming convention of RDF and PDF files: "Street Being Counted: \_ "Nearest Cross Street: \_ "Direction from Cross Street (E, W, N, or S). For example: "Sunnyside Rd\_93<sup>rd</sup> Ave E" - would describe a traffic count on Sunnyside Road east of 93<sup>rd</sup> Avenue.

At locations where two or more counts were conducted and separate files were generated (for example, where the roadway is separated by a median), combine each RDF and PDF files, plus a master spreadsheet containing all raw data (County will provide template).

# 2.3 <u>2017/2018 TRAFFIC COUNT PROGRAM (Year One Services):</u> <u>SCHEDULE AND PROGRESS REPORTS</u>

The Contractor shall not proceed with any phase of the work covered by the resulting agreement prior to receiving written authorization from the County.

The Contractor shall notify the County each week via email or phone indicating which count locations were successfully completed the previous week, and the count locations planned for the upcoming week.

Make oral and written reports of progress when requested. Oral reports will indicate current status of the project and may be used as an early indication of problems which may hinder the project. Identified problems shall be detailed in writing.

No counts shall be collected between November 20, 2017 and January 5, 2018 or between March 26, 2018 and March 30, 2018. All counts shall be completed by July 31, 2018.

# 2.4 <u>ONGOING TRAFFIC DATA COLLECTION SERVICES (Year Two Services):</u> <u>DESCRIPTION</u>

The Contractor may provide ongoing random data collection services for a period of one (1) year with the option to renew for one additional one-year terms upon the written agreement of both the Contractor and the County.

- 1. Manual turning movement counts
- 2. Roadway tube studies using TimeMark VIAS software
- 3. Delay studies
- 4. Gap studies
- 5. Speed studies
