Point In Time Summary for OR-507 - Clackamas County CoC

Methodology for OR-507 - Clackamas County CoC

Sheltered Population Total

1. What data source(s) was used to produce the total number of people included in the sheltered population (staying in an emergency shelter, Safe Haven, or transitional housing) on the night of the count? Please indicate the percentage of the PIT count derived from each of the sources. (If a source was not used, please enter zero).

HMIS Data	89%
Provider-level surveys	0%
Client-level surveys	11%
Observation	0%
Other	0%
Total	100%

2. Was the CoC able to collect information about the number of people being sheltered on the night of the count from all emergency shelters, Safe Havens, and transitional housing projects listed on the HIC or only some? listed on your HIC or only some?

- Complete census count

3. What information or method(s) was used to de-duplicate the count of the total number of people included in the sheltered population?

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number

Sheltered Subpopulation

4. What data source(s) was used to produce the demographic and subpopulation data included in the sheltered population (staying in an emergency shelter, Safe Haven, or transitional housing) on the night of the count? (select all that were used)

- HMIS Data
- Client-level surveys

5. Was the CoC able to collect information about the demographic and subpopulation characteristics of all sheltered people or only some?

- All sheltered people

6. Looking at the change in your sheltered count from last year's count, please choose up to three reasons that best explains these changes from the drop down list below.

- Change in emergency shelter capacity
- Change in transitional housing capacity
- Change in rapid re-housing capacity

Please provide a brief description of these specific factors (500 word limit):

Clackamas County provides winter warming shelters, which are only open when the wind chill predicted temperature drops below 33 degrees from Oct 1 to April 15th. In the 2018 count, most of these shelters were not open. In the 2019 count all winter warming shelters were open. During the 2018 count, two shelters were closed due to construction and one had not yet opened. Those three shelters were included in the 2019 count as well. ES beds went from 3 in 2018 to 203 in 2019.

Unsheltered Population

7. What approach(es) was used to count the total number of people included in the unsheltered population during the PIT count. (select all that were used)

- "Night of the count" - known locations

- Service-based count

7a. Were certain areas within the CoC geography specifically excluded because the CoC had reason to believe there were no unsheltered people in those areas?

No

7c. In areas that were canvassed, did the CoC count all unsheltered people in those areas or a sample of people?

- All people encountered during the count

8. What information or method(s) was used to de-duplicate the total count of people in the unsheltered population? (Check all that apply)

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number
- Interview/survey question(s) with screening questions (e.g., have you already completed a count survey)

Unsheltered Subpopulations

9. What approach(es) was used to collect demographic and subpopulation data about unsheltered people included in the unsheltered population during the PIT count?

- Surveys/interviews of people identified as unsheltered on the night of the PIT count
- Surveys/interviews of people identified as unsheltered on the night of the count, but completed at a later date
- Surveys/interviews of people identified within 7 days following the night of the PIT count night who may have been unsheltered on the night of the PIT count (e.g., "service-based" surveys at locations where people who are homeless go for assistance)

10. Were all people who were encountered during canvassing on the night of the count or during post night of the count PIT activities asked to complete a survey/interview?

- All people encountered were surveyed

11. What information or method(s) was used to produce an unduplicated total count of homeless people across your sheltered and unsheltered populations?

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number

12. Looking at the change in your unsheltered count from last year's count, please choose up to three reasons that best explains these changes from the drop down list below

- Change in emergency shelter capacity
- Change in rapid re-housing capacity
- Impact of coordinated entry

Please provide a brief description of these specific factors (500 word limit):

The increase in emergency shelter capacity between 2017 and 2019 (2 most recent unsheltered counts), resulted in a higher percentage of sheltered persons in the 2019 count. The 2017 HIC reported 77 ES beds, while the 2019 HIC reported 203 ES beds. This was a result of a coordinated effort to increase the number of beds available for those in need of winter warming shelters.

Clackamas County CoC has worked hard to address literal homelessness among families with children through improved coordinated entry processes and increasing RRH beds. Between 2017 and 2019, the HIC reports an increase of 75 RRH beds for homeless families. This increased capacity resulted in a 60% reduction of unsheltered homeless families with children.
