**CERTIFICATE OF COMPLETION**  
FOR PUBLIC SANITARY AND STORM UTILITY CONSTRUCTION

PROJECT: \_\_\_\_\_

I hereby certify that the all pipes, manholes and other devices have been constructed using approved workmanship and materials and (check the applicable boxes below):

- Public sanitary sewer system was constructed in accordance with the Public Sanitary Sewer Extension Guide, WES Rules & Regulations, and Sanitary Sewer Standards
- Stormwater management system was constructed in accordance with the WES Stormwater Design Standards and WES Rules and Regulations
- I further certify that the stormwater management facilities have the full design volume and the flow control device(s) were constructed in accordance with the approved plans and are functioning as designed.

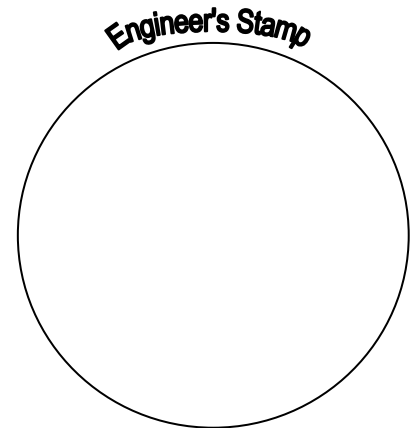

This certification is accompanied by the applicable items listed below:

- 1 paper copy and 1 PDF file of the sanitary and storm as-built drawings.
- Sanitary testing: MH vacuum, low-pressure air, and mandrel testing (District forms required).
- Video inspection with log reports of all publicly maintained sanitary and storm pipe (generally this will include storm pipe 8-inches and greater in diameter).
- Service connection drawings of the sanitary and storm service laterals.
- Sanitary and Storm system Cost Data Sheets.

The applicable items above will be submitted and reviewed by the District prior to scheduling a final construction inspection. If, during the; review of the submitted information, or final construction inspection, it is determined that the project is not 100% complete as indicated by this certificate of completion, the review process or final inspection will cease. The District will charge the applicant for a re-inspection fee prior to scheduling another inspection.
