## Medicine Cell

**Note:** Due to variations in manufacturer packaging, vial to preload changes, and other issues beyond each agency's control, it is important to make every effort to stay compliant with the best practice of medication locations. It is acceptable if your agency does not carry a listed medication. If your agency does carry a listed medication, please ensure it is located here. Each agency has autonomy to up-stock a particular medication as they see fit, but this is the minimum standard.
