

# Oak Lodge Library Seeds for Sharing Catalog

## DISCLAIMER

Many seeds shared by this Seed Library were grown by community members with love and care like our ancestors have done for thousands of years. Please know they may not meet state germination or labeling standards.

The Seeds for Sharing Library cannot guarantee the germination rates or purity of the seeds provided. Seed saving and gardening carry an element of chance. If you should check out seed that doesn't come true, please let us know by sending an email to the library

Most of our seed has been donated by seed companies and we keep it until it reaches its expiration date. It is not for resale.

We do not knowingly accept or share any seeds that are chemically treated, patented, or genetically modified.

## SEED GARDEN

We have a seed garden at New Urban High School, 1901 SE Oak Grove Blvd. You can volunteer any Thursday between 9:00 am and noon. For more information:

Facebook: Seeds for Sharing Library and Garden

Facebook: Oak Lodge Library

## ABBREVIATIONS

**AoT** = Ark of Taste variety; Slow Food Movement

**F1** = hybrid. Do not save seeds from plants you grow with these seeds. They will not produce the same plant.

**OSSI** = Open Source Seed Initiative. OSSI was created by a group of plant breeders, farmers, seed companies, and sustainability advocates who want to free the seed! OSSI works with plant breeders who commit to making one or more of their varieties available exclusively under the OSSI Pledge. If you see OSSI in a listing, see the "pledge" in the next paragraph

**OSSI Pledge:** You have the freedom to use these OSSI-Pledged seeds in any way you choose. In return, you pledge not to restrict others' use of these seeds or their derivatives by patents or other means, and to include this Pledge with any transfer of these seeds or their derivatives.

This "copyleft" commitment ensures that the Pledge is transmitted with any further distribution of the seed or the seed of any new varieties bred from it. In this way, OSSI preserves the unencumbered exchange of plant germplasm for breeding purposes and guarantees the rights of farmers and gardeners to save and replant seed.

For more information about the Open Source Seed Initiative, see [www.osseeds.org](http://www.osseeds.org)

## Please save seeds for the library!

**The best seeds are your locally grown seeds. The more times you plant, save seed, and plant again, the more adapted the seed is to our changing environment.**

There is a Seed Saving Check-in form available:

- In the seed cabinet at the library
- Last page of this document – print, cut it apart and complete it

Please turn in your seeds and check-in form to the front desk at the library.
