

Sunrise Corridor Community Visioning

Final Community Goals and Objectives

Updated June 2024 after Steering Committee #3

The Sunrise Corridor Community Vision will be guided by comprehensive goals and objectives for the study area. The following draft goals and objectives were developed based on community and committee input. They will underpin the next steps in the planning framework¹.

1. Create a safe and resilient transportation network for everyone that improves travel opportunities for pedestrians, bicyclists, transit riders, and drivers
 - Create an interconnected bicycle network that is safe and gets people where they want to go.
 - Create an interconnected pedestrian network that includes safe crossings, continuous sidewalks, Safe Routes to School, access for people with disabilities, and lighting.
 - Support an affordable, safe, and connected transit system that helps people get to jobs, services, and homes, and integrates with first- and last-mile solutions.
 - Enhance regional and statewide mobility for residents, employees and businesses by achieving the purpose and need in the Sunrise Corridor Final Environmental Impact Statement.
 - Provide roadways that facilitate the movement of emergency vehicles, goods, and services.
2. Support economic development
 - Assess and monitor existing facilities and buildings to determine how to best support changing business and community needs and remove development barriers.
 - Create a financially sustainable community where public investments directly benefit job opportunities.
 - Support workforce training in industries that provide livable wages to improve the self-sufficiency of individuals, students, and families.
 - Attract medium-sized businesses that offer livable wages.
 - Support that regional-scale freight mobility needs are met on Highway 212 connecting I-205 and US 26.
3. Preserve and enhance local identity, including historical and cultural assets
 - Identify how historical and cultural resources can be honored and shared to enrich the quality of life.
 - Identify and enhance environmental features and landmarks that promote community identity and create positive connections.
 - Identify and develop elements that support local identity and community development.

¹ The goals do not change the OR212-specific Sunrise Project Final Environmental Impact Statement Purpose and Need published in 2010.

Sunrise Corridor Community Visioning

4. Promote complete communities to meet the basic needs of all residents
 - Enable a diverse range of housing options, including those already present.
 - Use anti-displacement strategies to protect residents and businesses of all types.
 - Encourage a full spectrum of employment to help people live and work in the same area, reducing time spent commuting.
 - Protect and expand spaces for gathering, socializing, and sharing cultural and artistic expression.
 - Promote training and educational opportunities that allow individuals to improve their quality of life.

5. Enhance health, well-being, and sustainability
 - Reduce exposure to air, water, noise, light and other pollution, especially in and around the Clackamas River Watershed.
 - Provide healthy and resilient open spaces linking natural environments for people and wildlife.
 - Promote public health, safe movement, and active lifestyles through infrastructure, open space and programming.
 - Protect and enhance access to natural resources that people rely on, including the Clackamas River.

6. Create lasting improvements through agency coordination and partnership
 - Be clear about which people, organizations, and agencies participated in the project and implementation actions.
 - Create public-private partnerships to leverage resources and advance coordinated strategies to improve the community.
 - Continue inter-agency coordination to support actions to improve infrastructure for all users.
 - Build individual and community capacity to work together to implement shared goals and objectives.
 - Provide opportunities for interested community members to engage, especially those that may not have had access to engagement in the past.
