

Division: Community Health

Program: Public Health

Objective: To protect public health by responding to reported communicable diseases in a timely manner.

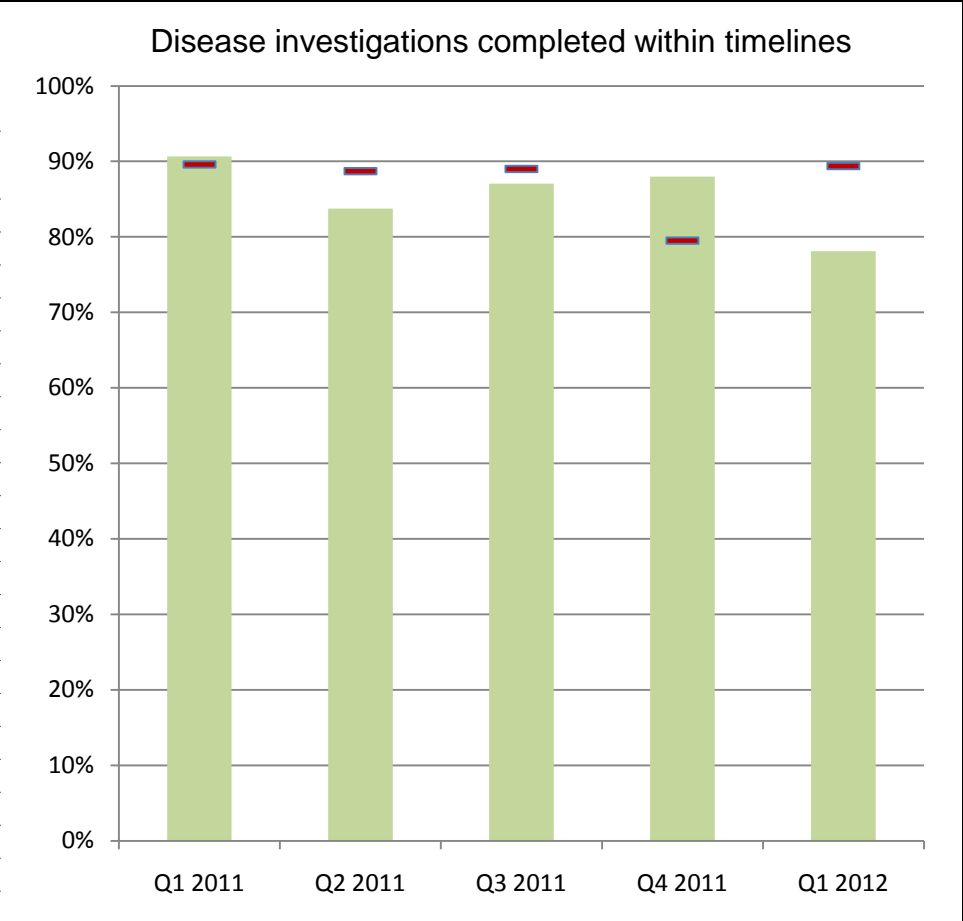

Measure Definition:

The number of disease investigations (excluding pertussis; which is investigated through the *Metro Area Pertussis Surveillance system*) completed within established timelines

Total number of cases reported during the quarter.

Measure displays the number of reported communicable diseases investigated within established timelines. It is developed from data derived from the ORPHEUS data system each quarter. Targets defined by State percent of timely investigations during quarter.

Date	Reported Diseases	Timely Investigation	Percent	Target
Q1 2011	139	126	91%	89.6%
Q2 2011	166	139	84%	88.7%
Q3 2011	162	141	87%	89.0%
Q4 2011	158	139	88%	79.5%
Q1 2012	137	107	78%	89.4%
Q2 2012				

Improved community safety and health
