Memo

Date:	Friday, January 3, 2025
To:	Transportation Policy Alternatives Committee and Interested Parties
From:	Grace Cho, Principal Transportation Planner Ted Leybold, Transportation Policy Director
Subject:	2028-2030 Regional Flexible Fund Step 1A.1 – Bond Scenarios and Reference Scenarios

Purpose: To provide an overview of five bond scenarios and reference scenario options and gather TPAC input prior to finalizing the scenarios to undergoing the financial assessment for the new project bond proposal development process.

Background & Current Place in Development:

As part of the adoption of the 2028-2030 Regional Flexible Fund Program Direction, regional leadership agreed to move forward in the development of a new project bond proposal (also referred to as Step 1A.1) for consideration by the region. After the candidate project evaluation of the nine transit projects in contention and gathering input towards concepts/themes as direction in shaping bond scenarios, the following materials are to share five identified potential bond scenarios (not financially assessed to date) and financial information for the reference book end scenarios.

28-30 RFFA Step 1A.1: Getting to a Preferred Bond Scenario

The bond scenarios and the subsequent financial assessment of the scenarios are among several pieces of information to inform and shape bond scenarios and an eventual preferred bond scenario/proposal for consideration by TPAC, JPACT, and Metro Council. These are:

- Technical Information
 - Performance evaluation
 - Bond purpose and principles
 - Regional Transportation Plan (RTP) goals and outcomes
 - Project delivery assessment
 - Financial assessment of bond scenarios
- Financial, Administrative, and Regulatory
 - Bond mechanism selection and requirements (e.g. restrictions, reporting, costs)
 - Regulatory and economic outlook
- Policy Direction
 - Objectives of the 28-30 RFFA Program Direction are met
- Partner and Public Input
 - TPAC, JPACT, and Metro Council input bond scenario themes/concepts
 - o Public comment
 - \circ $\;$ TPAC, JPACT, and Metro Council input on local priorities

Input on Bond Scenario Concepts & Themes

The input on the concepts and themes is to help guide and shape bond scenarios (also known as investment packages) to undergo financial assessment. The financial assessment of scenarios will help to answer critical questions on debt servicing, schedule, proceeds availability and understand the trade-offs. The information will support a discussion among regional partners as to whether a potential package can meet all the program direction objectives and ultimately if the region sees it as a strategic decision to move forward with a bond package at this time.

At the December meetings of TPAC and JPACT, Metro staff requested input on concepts and themes for bond scenarios development. Members responded and a summary of what was heard included the following:

- Maximize advancing the RTP goals and outcomes, with particular emphasis on equity, safety, and climate.
- Ensure the costs of bonding creates positive value and therefore:
 - Emphasize discretionary funding leverage
 - Take into account project readiness for implementation
- Represent a mix of transit investment types by having the three transit project categories represented.
 - Honor the deliberation by JPACT to expand bonding for other types of transit projects beyond high capacity transit.
- Emphasize regional and corridor-scale projects meeting regional needs.
- Ensure all Program Direction objectives are met, including having regional flexible funds invested throughout the region.
 - To create public support and unified lobbying power for federal discretionary dollars.

Metro staff aims to have a limited and manageable number of bond scenarios taken through the financial assessment to understand the overall commitment, tradeoffs, and costs for advancing revenues. In addition, Metro has a set of reference book ends scenarios to set context (described in a following section). As previously stated, regardless of the bond scenario concept, all bond scenarios will need to meet the policy direction adopted in the 2028-30 RFFA Program Direction.

Bond Scenarios

Based on the inputs available to date, Metro staff developed an initial draft set of scenarios which focuses on maximizing an individual theme. Table 1. outlines the draft scenario according to the theme. The theme of funding projects throughout the region – geographic representation – is not an individual project performance theme, but rather assessed on the package of projects identified. It may be utilized, along with other bond packaging considerations, such as the financial analysis, as a factor in selecting projects to include in a proposed bond package.

Scenario	Maximized RTP Outcomes	Leverage	Categorical Representation	Regional/Corridor Scale	Readiness
Projects	82 nd Avenue	82 nd Avenue	82 nd Avenue	82 nd Avenue	82 nd Avenue
	Transit	Transit	Transit	Transit Project	Transit
	Project	Project	Project		Project
	TV Highway	TV Highway	TV Highway	TV Highway	TV Highway
	Transit	Transit	Transit	Transit Project	Transit
	Project	Project	Project		Project
	Montgomery	Montgomery	Better Bus	Sunrise Gateway	Montgomery
	Park	Park	Program	Corridor Project	Park
	Streetcar	Streetcar			Streetcar
	Extension	Extension			Extension
	Transit	Transit	Sunrise	Transit Access	Transit
	Access and	Access and	Gateway	and Vehicle	Access and

Table 1. Bond Scenarios to Maximize Individual Themes

	Vehicle Priority – Burnside Bridge OR99E (McLoughlin Boulevard)	Vehicle Priority – Burnside Bridge 185 th MAX Overcrossing	Corridor Project	Priority – Burnside Bridge	Vehicle Priority – Burnside Bridge
Requested Bond Proceeds Total	\$114 million	\$117,618,499 million	\$86 million	\$100 million	\$105 million
Other Themes/Fac	ctor Achieved				
Readiness	high	medium-high	medium-low	medium	high
Leverage	high- medium	high	medium-low	medium	high
RTP Outcomes	high- medium	medium-high	medium	medium-high	high
Category Representation	high	high	high	high	medium
Corridor/Regional Scale	medium	medium	medium-high	high	high- medium
Geographic Representation	high	low	high	high	low

The draft bond scenario concepts try to maximize performance according to an individual theme. As identified in the "other themes achieved" section of the table, maximizing performance under one theme can lower performance in other themes. Under these draft bond scenario concepts, no one scenarios can meet all the Program Direction objectives without considering a tradeoff in performance.

With the resulting bond scenario concepts unable to meet all the Program Direction objectives, Metro staff propose developing bond scenarios that achieve a balance of maximizing acceptable performance across all the bond themes. The development of these scenarios will be informed by the input and performance analysis to date. These scenarios will be utilized, along with financial analysis of bond funding capacity and costs, to frame the development of a preferred bond proposal. Metro staff seeks input on this approach.

Financial assessment has not begun on the bond scenarios, so at this time it is still undetermined as to whether the scenario as an investment package can meet certain key bond principles as outlined in the Program Direction.

Bond Mechanism Reference Options

In efforts to provide context setting for the building the bond scenario packages, Metro staff developed a set of bond mechanism reference scenarios. While a bond mechanism has yet to be selected, among the several different factors affecting the selection of a bond mechanism, two basic options are in consideration.

• Bond mechanism option 1 – single bond: use of a single bond mechanism to advance funds for projects identified in the preferred bond scenario, as long as the projects meet bond requirements and administrative criteria. Requires additional partnerships to facilitate the

ability to utilize a single bond mechanism to meet the bond mechanism requirements or administrative criteria.

• Bond mechanism option 2 – multiple bonds: use of more than one bond mechanism to advance funds for projects identified in the preferred bond scenario. Allows for different types of projects without additional partnerships to meet bond mechanism requirements or administrative criteria.

Based on revenue forecasts, each bond mechanism option has a high and low estimate of possible proceeds to be generated to address the Program Direction principles specified for consideration of bonding Regional Flexible Fund revenues.

Bond Mechanism Option 1 – Single Bond

Optimistic RFFA Revenue Forecast	
\$84M	
\$127M	
Less Optimistic RFFA Revenue Forecast	
\$70M	
\$109M	

Bond Mechanism Option 2 – Multiple Bond*

Optimistic RFFA Revenue Forecast	
Proceeds generated	\$TBD
Overall cost (in year of expenditure)	\$TBD
28-30 Step 2 available	
Less Optimistic RFFA Revenue Forecast	
Proceeds generated	\$TBD
Overall cost (in year of expenditure)	\$TBD
28-30 Step 2 available	

*Multiple bond mechanism costs are still under development

While the proceeds and costs under a multiple bond mechanism are still under development, the higher costs to account for double the number of fees and requirements will likely result in less bond proceeds available to allocate to projects. Lastly, if the region elects not to move forward with a new project bond at this time, then the estimated 28-30 Regional Flexible Funds under each category is as follows:

- Step 1A \$51.78 million
- Step 1B \$40.58 million
- Step 2 approximately \$57-\$60 million

Discussion Questions

1. What input do TPAC members have on utilizing an approach that balances maximizing acceptable performance across all the bond themes of: RTP outcomes performance, leveraging of other funds, inclusion of all transit category types, corridor scale projects, project readiness, and geographical representation, to develop bond package scenarios and a preferred bond package? (e.g. are there specific trade-offs in performance of bond themes that TPAC members would like to have presented by draft bond package scenarios)? Are there local factors or priorities for consideration?

2. What questions do TPAC members have in relation to the bond mechanism reference scenarios?

Next Steps - 2028-2030 RFFA - New Project Bond Development Process

Through March 2025, Metro staff will continue analysis and provide information to support the discussion of shaping bond scenarios and ultimately taking action on a preferred bond scenario to carry through public comment. Tables 2. and 3. both summarize upcoming bond development activities and key dates. Short descriptions of the activities follow.

Timeframe	Activities	Audiences	
January 2025	 Technical Information Financial assessment of bond scenarios (draft) Financial, Administrative, and Regulatory Bond mechanism identification and requirements (e.g. restrictions, reporting, costs) Partner and Public Input Metro Council input bond scenario themes/concepts 		
February 2025	Technical Information Financial assessment of bond scenarios (revised) Financial, Administrative, and Regulatory Bond mechanism selection and requirements (e.g.) 		
March 2025	 Technical Information Financial assessment of bond scenarios (for preferred scenario) Policy Direction 28-30 RFFA Program Direction objectives met Partner and Public Input TPAC, JPACT, and Metro Council input on local priorities Open public comment 	TPAC JPACT Metro Council*	
April 2025	Public comment	Public	

Table 2. Upcoming Activities, Timeframe, and Audiences

*Indicates tentative date. Unconfirmed on committee or Metro Council calendars.

<u>Project Evaluation and Bond Scenarios Assessment (December 2024 – February 2025)</u> Following the candidate project evaluations, Metro staff seeks to gather regional partner input concepts/themes build different scenarios for financial evaluation. With the candidate evaluation results as a starting point for the discussion, this input was sought in December 2024 in efforts to maintain the schedule for completing the financial analysis of the scenarios.

With the combination of the concepts/themes input and the candidate evaluation results, Metro staff continue to develop scenarios, while gathering partner input, to go through a financial analysis to understand additional information regarding costs, revenues advances, future revenues committed to debt service, and implications for Step 2. Scenarios will be assessed under the

identified and selected bond mechanism or bond mechanisms, which may add new considerations or complexity towards the incurred costs for bonding. The financial analysis will convey the different funding tradeoffs relative of each composed scenario while adhering to the bond principles in the Program Direction.

Metro staff will engage with community members on potential bond scenarios during this time frame through outlets such as Metro news. A first look at the draft financial analysis of the bond scenario analysis is anticipated for January 2025 with revised updates in February and March as input and further information on the regulatory and economic outlook comes into focus. The bond scenario analysis results will be shared with TPAC, JPACT, and Metro Council. The committees will have the opportunity to provide input and/or recommendations as they deliberate composing the preferred bond scenario/proposal.

<u>Preferred Bond Scenario/Proposal Selection and Public Comment (February – May 2025)</u> The results of the bond scenarios assessment will be presented at TPAC and JPACT. At the committee meetings regional partners will have the opportunity to express their preferred bond scenario or local priorities, or components of different scenarios to create a preferred bond scenario/proposal. The preferred bond scenario will be assessed one last time to assure the size, schedule of repayment, and funding availability meet the bond purpose and principles. At the following meeting, Metro staff will request TPAC recommendation for JPACT to consider releasing the preferred bond scenario/proposal for public comment.

Step 1A.1 and Step 2 will converge at the public comment period, where the public comment will solicit whether there is general support for the preferred bond scenario, gather input on the Step 2 candidates. Following the public comment period, a summary and public comment report with responses and, as appropriate, recommendations in response to comments will be available for TPAC and JPACT deliberations.

Deliberations and Adoption (June – July 2025)

Following the public comment period and public comment report, the regional committees will have until July to deliberate on the preferred bond scenario/proposal. Any additions or significant changes via an amendment to the preferred bond scenario at this stage will be subject to re-evaluation for meeting policy objectives and financial analysis. Future conditions on the allocation approval will also be adopted at this time to ensure projects continue to meet the Program Direction principals and objectives, the intent of the final allocation decision, identified risk management issues, and bond mechanism and bonding agency requirements. Metro staff will request TPAC and JPACT for recommendation to approve the full 2028-2030 Regional Flexible Fund Allocation at their July 2025 meetings.

Activity	Date
Bond scenarios development and assessment	December 2024 – January 2025
Utilizing concept and themes input

Memorandum

То:	C4 Metro Subcommittee
From:	Team TPAC, Representing Clackamas County & Clackamas Cities
Re:	January 10, 2025 TPAC Highlights
Date:	January 13, 2025

Overview

Following is a summary of the January TPAC Meeting and a look ahead into future meetings. January meeting materials can be found <u>here</u>.

General Updates

- <u>Fatal Crash Update</u>: According to recent data available, Metro shared that there were approximately 8 traffic deaths in December across Clackamas, Multnomah, and Washington counties. Of this total, 3 people died while walking, 4 while driving, and 1 while using a motorcycle. One fatality occurred in Clackamas County. Metro continues their commitment to a safe systems approach, advocating for safe streets, speeds, and people. A project link to recent efforts to improve safety for walking, biking or rolling by upgrading the currently unsignalized crosswalk on U.S. 26 (SE Powell Boulevard) and SE 36 Avenue, a link to Portland State University <u>Reducing Conflicts Between Turning Motor Vehicles and Bicycles</u> research study, and a link to the City of Tualatin's installation of Rectangular Rapid Flashing Beacons (RRFSs) at 30 crosswalks on local streets through Tualatin's Moving Forward program was shared.
- <u>Transit Minute</u>: December ridership was estimated to be in the range of 68% to 70% of pre-pandemic levels; specific data is forthcoming and will be published on Metro's website imminently. TriMet, C-TRAN, and SMART all offered free rides on New Year's Eve to prevent impaired driving, in addition to extending service hours for celebratory events. C-TRAN has also launched a daily fixed route service to downtown La Center and Metro announced that two of Multnomah County's shuttle routes will be replaced by expanded TriMet bus services.
- <u>RFFA Step 2</u>: Metro reminded TPAC members participating in the 2028-30 RFFA Step 2 process that the open refinement period for clarifications and additional information ends in one week. Applicants who have not received communication from Kittleson and Associates are encouraged to reach out before the deadline.
- <u>Administrative Amendments and UPWP Update</u>: Metro outlined amendments to the Unified Planning Work Program (UPWP), which provides a comprehensive overview of regionally-significant planning initiatives for the upcoming fiscal year. This update highlighted two new projects funded by the federal Safe Streets for All Program: the City of Milwaukie Safety Assessment on the Harrison Street Corridor and the Clackamas County Consolidated Safe System Planning Project. The amendments will be sent to USDOT for approval and made available online.
- <u>Transportation System Plan (TSP) Survey Update</u>: Metro provided an update on the region's Transportation System Plan liaison program. A new survey targeting project managers and staff involved in TSP development will go live, Monday, January 13th. The survey seeks to evaluate the effectiveness of current TSP support systems and to establish a regional network of active TSP practitioners.
- <u>Minutes Approved</u>: The December 6th TPAC minutes were approved with no changes.

- <u>MTIP Amendments Summary</u>: TPAC recommended JPACT approval of MTIP Resolution 25-5456 for the purpose of amending or adding a total of nine projects to meet federal transportation project delivery requirements. Of these nine, 6 related to Americans with Disabilities Act (ADA) curb ramp upgrades, 2 involve Congressionally Directed Spending (CDS) for safety improvements, and 1 is a partial project cancellation. The following summarizes each:
 - <u>New ADA Upgrade Projects</u>:
 - Portland Metro Area 2024-2027 Curb Ramps, Phase 3 (Key 23734) construct curb ramps to meet compliance with the ADA standards on OR99E and US26.
 - Portland Metro Area 2024-2027 Curb Ramps, Phase 5 (Key 23762) construct curb ramps to meet compliance with the ADA standards on OR219 and OR8.
 - Portland Metro Area 2024-2027 Curb Ramps, Phase 4 (Key 23748) construct curb ramps to meet compliance with ADA standards along I-84, US26, US30, OR99E, OR211, OR281, and OR282.
 - OR8 Curb Ramps (Beaverton & Hillsboro) (Key 23770) construct curb ramps to meet compliance with ADA standards on OR8.
 - OR224 & OR213 Curb Ramps (Happy Valley & Mulino) (Key 23771) construct curb ramps to meet compliance to ADA standards on OR224 and OR213.
 - OR141 Curb Ramps (Durham) (Key 23772) construct curb ramps to meet compliance with ADA standards on OR141.
 - CDS Funding Awards:
 - East Forest Grove Safety Improvement Project (Key 23814) on OR8 / N Adair Street in eastern Forest Grove at the Yew Street intersection, install a new traffic signal to reduce crashes and provide better protection (CDS 2024 award #225).
 - City of Portland Safety Project (Key 20304) work may include intersection improvements upgrade to ADA; utility relocation; signal work; medians; traffic separators; striping; signing; warnings and other safety improvements (ARTS PGB).
 - Existing Projects / Partial Cancellation:
 - OR120: Columbia Slough Bridge (Portland) (Key 21709) \$15,254,100 removed from the PE and ROW phases; funds will be reprogrammed to ODOT's Abernethy (Key 22467 I-205: I-5 to OR213, Phase 1A) and Center Street Bridge (Key 21705 OR22: Center Street Bridge Salem) projects. A planning phase remains with \$676,998 programmed. Prior amendment description: Bridge replacement of the existing timber structure that is obsolete, costly to continuously repair, and can no longer support heavier loads.

82nd Avenue Transit Project

Overview and Project Timeline

The project focuses on upgrading TriMet's Line 72 to Frequent Express (FX) bus rapid transit (BRT) service to improve speed, reliability, and accessibility along 82nd Avenue. The timeline includes planning completion in 2025, final designs by 2027, and project construction beginning shortly thereafter, with a projected opening in 2029. With an ownership transfer in 2022 from ODOT to PBOT for the corridor portion within the City of Portland, the project is requesting \$149.9 million in federal funding. The project aligns with regional transit and development strategies, aiming to serve a dense and growing population with significant transit dependency. The corridor includes diverse, underserved communities, such as BIPOC, low-income, and limited English proficiency populations.

Locally Preferred Alternative (LPA) Update

The LPA identifies high-level project partners, general station locations, and route alignment; the proposed alignment spans 10 miles between Clackamas Town Center and Killingsworth Street. The project will introduce 68 improved stations with shelters, seating, lighting, and real-time information, alongside enhanced crossings, accessibility upgrades, and new hydrogen-electric articulated busses. Discussions about potential transit-priority lanes are ongoing, and further community and jurisdictional endorsements will follow the steering committee vote.

Equitable Development Strategy

Developed in parallel with the transit project, an Equitable Development Strategy aims to mitigate potential displacement and ensure community benefits. This strategy emphasizes community-led planning, drawing influence from previous projects like the Division Transit Project and Southwest Corridor. The Equitable development Strategy identifies policies and investments to stabilize residents and businesses along 82nd Avenue, emphasizing community coalition efforts to implement goals, supported by \$2 million from Reconnecting Community grants.

TPAC Feedback and Next Steps

Several TPAC members raised questions about the steering committee decision-making process, specifically about the process for transit-dedicated lanes and the input from the Equitable Development Strategy before steering committee vote. On both topics, Metro says the decision will be informed by technical work, public engagement, and recommendation from advisory committees. For next steps, TPAC will review and recommend the LPA in May, with an action scheduled for June.

FOOD FOR THOUGHT

• While this project is proposed to make improvements along the 82nd Avenue corridor, there remains many portions of the county without transit service at all, and still many other areas lacking in the frequency and service quality needed to grow transit ridership.

2028-30 Regional Flexible Fund Step 1A.1 New Project Bond – Bond Scenarios and Reference Scenarios Analysis

Overview of Bond Scenarios and Reference Scenario Analysis

This process involves developing a preferred bond scenario through a multi-input framework that integrates quantitative evaluations, partner input, and alignment with regional policy goals. Bond scenarios aim to address five key themes: geographic equity, leveraging federal funds, readiness for implementation, alignment with regional priorities, and maximizing community benefits. The initial scenarios were intentionally unconstrained to explore potential project packages and their thematic inputs. However, Metro says that narrowing these options will be essential for conducting detailed financial assessments and ensuring that these scenarios align with program direction.

Three Reference Scenarios

Metro presented three reference scenarios to provide financial context and guide the bond assessment. Option 1 involves a single bond mechanism, generating \$70-\$84 million in proceeds with total debt service costs ranging from \$109-\$127 million. Option 2 proposes a multiple-bond mechanism, which is likely to incur higher costs due to multiple organization fees and lower overall proceeds. Option 3 assumes no new bond issuance, allocating

funds directly to existing commitments and Step 2 projects, leaving approximately \$57-\$60 million for competitive grants.

TPAC Discussion, Questions, and Feedback on Bond Scenarios and Process

During discussion, committee members recognized that using bonded funds is expensive and should be done prudently, raised critical questions about the 12-year repayment period and its financial implications, the potential to leverage bond dollars to secure substantial federal investments, the practical utility of scenarios exceeding projected funding capacity and the need to balance diverse program objectives, such as investments in all parts of the region and leveraging federal funds, while ensuring financial feasibility. The committee advocated for clearer distinctions between project development and construction readiness and committee members provided feedback from Washington County mayors, who support a single bond approach.

Next Steps

Metro will finalize the bond scenarios and conduct detailed financial assessments to prepare for public comment. TPAC's role will be important in shaping a balanced proposal that addresses regional priorities and financial constraints. The preferred bond proposal will be presented for JPACT and Metro Council approval, with public feedback collected from March 24th to April 30th.

FOOD FOR THOUGHT

• How should this bond process best honor recent deliberation by JPACT to expand bonding for other types of projects beyond high-capacity transit? While the proceeds and costs of a multiple bond mechanism are still under development, a multiple bond mechanism is likely necessary to advance project nominations across all three project categories, including those submitted from within Clackamas County. A single bond mechanism would likely only favor high-capacity transit project submittals.

FFY 2025 Redistribution Funds Options Update

Summary and Next Steps

Metro introduced an update on FFY 2025 Redistribution Funds, explaining that \$10 million of the \$13.5 million received from federal distribution was allocated to address project inflation impacts. Metro outlined two potential approaches for distributing these funds: (1) the percentage-based approach and the targeted funding approach. The percentage-based approach (Option 1) proposes allocating 80.6% of each project's funding request, ensuring all nine projects receive some support. This approach promotes equitable distribution but requires many local agencies to provide additional matching funds. The targeted funding approach (Option 2) prioritizes specific projects based on delivery factors and leaves some projects unfunded or partially funded.

TPAC members provided input on the redistribution options, with Washington County members expressing strong support for Option 1. Other members highlighted the need to maintain project momentum and meet federal obligations to secure future redistribution funds and another member suggested confirming whether recent project bids had resulted in cost savings, which could influence funding gaps under Option 1.

Metro staff will reach out to project sponsors to verify their availability to provide additional matching funds under the percentage-based approach. Final recommendations will be presented at the February TPAC meeting for approval and recommendation to JPACT.

Overview

Following is a summary of the October MTAC Meeting. Meeting materials can be found here.

General Updates

- The Metro Nature in Neighborhoods capital grants program is accepting applications until January 21st, 2025. Please visit the <u>program website</u> and Nature in Neighborhoods Capital Grants <u>Handbook</u> for more information.
- The City of Milwaukie has been awarded a \$15 million grant through the Infrastructure and Jobs Act for the Kellogg Creek Restoration and Community Enhancement Project. The objective of this effort is to restore threatened fish access to 15 miles of habitat in the Kellogg Creek-Mt. Scott watershed, modernize the Highway 99E Bridge while improving multi-modal transportation, and provide safe pedestrian access to a restored natural area. This project is a collaboration between the City of Milwaukie, American Rivers, North Clackamas Watersheds Council, and the Oregon Department of Transportation. The grant will be used to complete project planning, and the groups will target additional funding to complete the construction phase of the project. For more information, see updates from the City of Milwaukie's website.
- MTAC extends a fond farewell to longtime committee member Marie Miller ahead of her retirement and a warm welcome to new committee members Brett Morgan and Christopher Fortin, representing Environmental Advocacy Organizations.

MetroMap and the Quick Facts Viewer

Madeline Steele from Metro presented <u>MetroMap</u> and the <u>Quick Facts Viewer</u>, two online geospatial platforms for accessing regional data and analytics. MetroMap facilitates mapping applications across the region with planning insights, including historical urban growth boundary layers and annexation data. The Quick Facts Viewer provides demographic statistics and ACS-based updates for regional geographies.

Discussion Highlights & Next Steps:

• Committee members praised the platforms' integration of mapping and data for significant time savings for local planners but expressed concerns about differentiating public land ownership in MetroMap, because public parcels are often aggregated in ways that may obscure jurisdictional

distinctions. A refinement process for data assurance was suggested to support quality improvement.

- Members asked about the historical depth of annexation records available through MetroMap. Metro staff clarified that data date back to 1969 as a means for long-term historical analysis.
- <u>Next Steps</u>: members and Metro staff agreed to continued user feedback integration to ensure the tools meet the needs of planners and to provide updates in parcel ownership classifications to improve accuracy and usability.

Urban Growth Management Decision: Follow-up on Process

Ted Reid from Metro provided a summary of Metro Council's December 5th decision to adopt the Urban Growth Report by Ordinance Number 24-1520, resulting in the expansion of the urban growth boundary into Sherwood West urban reserves. The decision also included conditions of approval (Exhibit B to the ordinance), addressing the number of homes to plan for / residential density, housing affordability, industrial areas, 2040 Growth Concept design types, broad-based community engagement, tribal consultation and resource protection, habitat, comprehensive planning deadlines, and reporting.

Discussion Highlights & Next Steps:

- Committee members expressed interest in how the regional growth forecast aligns with housing targets and voiced concerns about the possibility of discrepancies of the distributed forecasts and the state's mandated housing targets, which may lead to complications for local jurisdictions.
- Members asked for clarity on the Governor's executive authority for UGB expansions under Senate Bill 4 and its implications for industrial land in Hillsboro. Staff provided context, noting that Senate Bill 4 allows the Governor to authorize expansion in specific cases, particularly for semiconductor-related industrial needs. Members expressed concern about potential misalignment between state-level decisions and regional objectives and proposed closer monitoring and coordination.
- <u>Next Steps</u>: Metro Council will revisit recommendations and establish priorities for follow-up in early 2025 in finalizing Sherwood's planning agreements, providing communication about compliance expectations.

Safe Streets for All Update

Lake McTighe from Metro presented an update on the Safe Streets for All program, focusing on regional traffic safety analysis and systemic approaches to address pedestrian fatalities. Key findings highlighted the prevalence of fatal crashes in equity focus areas and the growing risk posed by larger vehicles. The presentation also provided an in-depth look at systemic safety approach and planned measures for 2025.

Discussion Highlights:

• Committee members highlighted the significance of land use in shaping transportation safety outcomes and asked questions about why pedestrians often cross roads at non-intersection locations, linking it to the lack of accessible crossing and nearby transit stops. This idea

underscored the need for integrating land use planning with transportation safety strategies to reduce risks for vulnerable road users.

 <u>Next Steps</u>: Metro will deploy new safety data dashboards and updates to existing analyses in 2025 and expand advocacy for pedestrian-focused infrastructure, such as medians, lighting, and rapid flashing beacons, to enhance safety in high-risk areas. The program will also set its sights on the completion of local safety action plans and the exploration of additional federal grants to support quick-build safety projects in the future.

Upcoming Agenda Highlights

FEBRUARY 19, 2025 – MEETING (VIRTUAL)	MARCH 19, 2025 – MEETING (VIRTUAL)
Agenda TBD	Agenda TBD
Parking Lot / Bike Rack: Future Topics:	
• Status report on equity goals for land use	
and transportation planning	
 Regional city reports on community 	
engagement work / grants	
 Regional development changes reporting 	
on employment / economic and housing as	
it relates to growth management	
 Update report on Travel Behavior Safety 	
• Updates on grant funded projects such as	
Metro's 2040 grants and DLCD / ODOT's	
TGM grants. Recipients of grants	
 Transit-Oriented Development (TOD) 	
annual report / project profiles report	
APRIL 16, 2025 – MEETING (HYBRID)	MAY 21, 2025 – MEETING (VIRTUAL)
Agenda TBD	Agenda TBD
