

Multifamily Service Calculations

Multifamily property owners/managers need to provide adequate garbage and recycling service (sufficient volume for amount generated). The minimum service calculation is to help “right-size” service. Minimum service may not be adequate. Adequate service is usually somewhere between the minimum and *recommended* service levels (varies by community).

Weekly per Unit Service (Gallons)		
Minimum	Recommended	
20	Garbage	40
20	Recycle	40
1	Glass	3

 Units

(enter units above)

Current Service

Enter # of Bins & # of Weekly Pick-Ups for each size bin onsite (leave others blank).

Bin Type	Bin Size	Garbage		Recycle		Glass	
		# of Bins	# of Weekly Pick-Ups	# of Bins	# of Weekly Pick-Ups	# of Bins	# of Weekly Pick-Ups
Carts (gallons)							
Dumpsters (yards)							

Compactors: For compactor service, enter the compactor yards as the # of bins for a 3 yd dumpster with the appropriate # of weekly pick-ups for an approximate estimate.
