What to do if you've tested positive for, or are showing symptoms of, COVID-19

Regardless of your vaccination status... ISOLATE!

After 5 days...

No symptoms
No symptoms, or resolving symptoms, including no fever for 24 hours without medication?

You can leave your home with a mask

Option to test, if available
Did you take an antigen test on day 5?

Yes

No

+ Positive

− Negative

COVID-19 symptoms
Worsening or not improving?

Isolate
Stay home and away from others for a minimum of 5 days.

End isolation and wear a mask
You may end isolation if you continue to wear a mask around others, even at home, for 5 days.
