REQUEST FOR PROPOSALS #2018-70
3D Model Program
RESPONSE TO CLARIFYING QUESTIONS #1
September 12, 2018

Note that these are questions submitted by interested firms to the above referenced solicitation. The below answers are for clarification purposes only and in no way alter or amend the RFP as published.

1. *Can you provide some more background on the program? Not so much the past projects, but rather the drivers for the County on creating the program.*

Answer: The purpose of the Clackamas County 3D Modeling on Main Street program is to increase property values, retain and recruit business, and enhance the appearance of downtowns by creating visual imaging to encourage architecturally appropriate improvements in Main Street downtown commercial districts located in Clackamas County.

2. *Are you able to share the source of funding for the program?*

Answer: Our goal is to provide achievable concepts working with property owners and the budgets they have for redevelopment. We will provide \$5,000 worth of 3D modeling per community, per year. This is somewhat flexible in that we could have fewer project demands and provide more than one project for a community.
