

# Do you know your wastewater and stormwater?

CLACKAMAS  
WATER  
ENVIRONMENT  
SERVICES

## Down

1. An \_\_\_ is the discharge point where the treated water flows in to the river.
2. It's best to use \_\_\_ plants when landscaping.
3. A product of the wastewater treatment process that can be applied to fields as fertilizer.
5. Fats, oils, and \_\_\_ should be disposed in your trash, not down the drain.
6. It falls from the clouds.
8. Wastewater that arrives at a water resource recovery facility is called \_\_\_.

## Across

4. It's important to keep storm drains clear to prevent \_\_\_.
7. Clackamas Water Environment Services cleans more than seven \_\_\_ gallons a year.
9. Land area that drains rainfall and snowmelt to a single stream, river, or other water body.
10. These common household items are often labelled flushable, but you shouldn't.
11. Never hose down a \_\_\_. This can send hazardous pollutants to our rivers and streams.
12. This gas is a byproduct of the wastewater treatment process, and is being used at the Tri-City Water Resource Recovery facility to generate power.
