

Stewardship of the Environment

Water Environment Services (WES) is passionate about protecting public health and the environment, seven days a week, 365 days a year. When it comes to environmental stewardship, we never take a day off, cleaning six billion gallons of wastewater every year. WES also provides water quality protection by implementing programs to reduce pollution in our waterways caused by stormwater runoff.

Water is valuable.
We *treat* it that way.

Stewardship of Ratepayer Dollars

We at Water Environment Services (WES) take our responsibility as stewards of ratepayer dollars seriously. Standard & Poors, the financial ratings service company, recently upgraded WES to its highest issuer credit rating of “AAA”, which indicates excellent financial health and management. S&P’s upgrade helps save money for our customers through lower interest rates for future borrowing for projects to better serve you both now and in the future.
