

CLACKAMAS COUNTY BOARD OF COUNTY COMMISSIONERS

Policy Session Worksheet

Presentation Date: April 10, 2024 Approx. Start Time: 10:30 Approx. Length: 60 minutes

Presentation Title: Recovery Oriented Service Center Data Update

Department: County Administration and Health, Housing & Human Services

Presenters: Cindy Becker, County Administration

WHAT ACTION ARE YOU REQUESTING FROM THE BOARD?

This is an informational session regarding the development of a Recovery Center for individuals with substance use disorders (SUD) in Clackamas County. The purpose is to provide the Board with information about activities that have occurred along with activities planned, answer any questions, and identify additional information wanted by the Board.

EXECUTIVE SUMMARY:

Background:

In April 2023, the Board approved a resolution supporting a Recovery-Oriented System of Care for individuals with substance abuse or mental illness challenges. In September, the Board hosted the Clackamas Addictions Recovery Summit with experts from Oregon, Canada, California, and Texas. The purpose of the Summit was twofold: 1) to hear from panelists about best practices and lessons learned to create a recovery-oriented system of care and 2) to engage with a diverse group of community stakeholders around local issues and ideas.

A key recommendation from the panelists was to create a Recovery Center for individuals with SUD. In December, the Board met for a planning session and provided general direction to proceed with the development of a Recovery Center. During that session, the Board also provided positive feedback on the proposed vision statements, goals and objectives presented by staff.

Mission and Vision, and Operating Model:

As guided by the discussion at the planning session in December, staff recommend the following statements to provide the foundation for the work ahead:

VISION

Clackamas County envisions recovery for all individuals struggling with substance use.

MISSION

To ensure that individuals struggling with substance use receive timely person-centered support, treatment, and resources to help them achieve and sustain long-term recovery.

OPERATING MODEL

Staff have developed the following Operational Model to guide development of the Center

- Services will be co-located in one or more buildings
- There will be multiple pathways to enter services
- Services will be delivered by provider agency(s) with relevant experience and expertise
- Peers will be an integral part of the model and processes from initial assessment to treatment, navigation, and reintegration back into the community
- Natural supports, including family and friends, will be engaged whenever possible
- Strong partnerships with public safety and medical providers will be built into the model to divert individuals from inappropriate jail or emergency rooms and support individuals during transitions back to the community.
- Services will be voluntary
- A hub and spoke model will be created to reach out to rural and underserved communities
- A phased approach will be used depending upon financing, construction, and other variables.

At this juncture, staff recommend that the first phase of the Center serve adult men and women. They represent the highest acuity population that impacts multiple systems and costs.

Progress To Date:

Staff are working diligently to proceed with the Board directive of taking a data-informed approach to establishing a Recovery Center. Meetings have been convened with provider agencies and peers who deliver SUD services in Clackamas County to discuss what services are currently being provided and where the needs/gaps are in the system. Providers have also toured a couple potential locations and provided feedback on the viability and potential uses for the sites. Staff are meeting with potential funding partners and have worked with Public and Government affairs to submit State and Federal funding requests during the most recent legislative sessions.

Data:

At the planning meeting, the Board requested an inventory of services available to Clackamas County residents for individuals accessing public, private and self-pay treatment and services, as well as information on the types of drugs they are using, their current living condition, age and marital status, drug related convictions and mental health/physical health issues.

Getting a complete picture has proved challenging. There is no central location of all service providers nor a list of openings and wait lists to see who is not being served. There are separate data systems for SUD and homelessness and provider information varies based on their funding and services, making it very challenging to compare data sets in an apples to apples comparison. That said, attached please find three documents that provide information regarding the need for recovery services in Clackamas County.

Attachment A provides several data sets that look at Substance Use Disorder from a state and county level, the results of untreated SUD in hospitals and the jail, and data from Health Share and the County's Health Centers.

Attachment B includes the results of an informal survey and discussions with the largest provider agencies and peers located in the county along with a table of needs identified by H3S staff, Summit panelists and providers. Top needs identified are detox/withdrawal management, housing (pre-engagement, transitional, and recovery), and medication assisted treatment (MAT).

Attachment C is an excerpt from a document provided by the Oregon Health Authority. While it is a good representation of the providers in the county, there are providers missing from their list.

There is no precise analysis or formula of capacity/services/supports that need to be in the Recovery Center. Instead, the actual number of people served, and services provided will be a function of several factors: identified property, amount and type of structures constructed or rehabbed, one-time funding availability, and proposals from provider agencies. By using a phased approach to development, the County will be able to minimize risk and build a model that reflects opportunity, availability and need.

Next Steps:

Near term, next steps include meeting with the EMS Council (at their invitation) as well as the District Attorney, Sheriff’s office, and hospitals and emergency department staff. Meetings with a core group of providers will continue as we refine recommendations for services and operations. Staff will continue to build out the inventory of services currently being offered and a communications plan will be developed in anticipation of outreach to the community. All of this work will culminate with a proposal to the board with recommendations on structure, program design and a funding plan.

FINANCIAL IMPLICATIONS (current year and ongoing):

Is this item in your current budget? YES NO

What is the cost? \$ TBD What is the funding source? TBD

STRATEGIC PLAN ALIGNMENT:

- How does this item align with your Department’s Strategic Business Plan goals?
 - Improved Community Safety and Health
- How does this item align with the County’s Performance Clackamas goals?
 - Ensure Safe, Healthy, and Secure Communities

LEGAL/POLICY REQUIREMENTS: None yet; any related state and federal laws will be addressed as staff moves through the development process

PUBLIC/GOVERNMENTAL PARTICIPATION: Staff has met with private provider agencies and peers to date. Additional communication and outreach will be conducted over the next several months.

Clackamas Coordinated Housing Access: Waitlist Data

The By-Name-List is constantly shrinking, because we are housing people off it and cleaning up the data, removing people who are no longer experiencing homelessness in the county, or who for a variety of reasons can no longer be contacted to verify they remain in the county, in need of, and qualifying for services. **This list is now down to around 700 people.**

Individuals who are Actively Houseless

General data on people who are “actively homeless,” living in an unsheltered situation and not yet placed into permanent housing through H3S programs, report with a lookback period to 1/1/2023:

- 523 individuals currently unhoused (no exit date, prior living situation=’place not meant for habitation’)
- 354/523 (67.7%) individuals identified as chronically homeless
- 31/523 (5.9%) individuals identify as veterans
- 55/523 (10.5%) individuals in households with children
- 106/523 (20.3%) individuals are DV survivors
 - 62/523 (11.9%) individuals are currently fleeing DV
- 52/523 (9.9%) individuals have either an alcohol or drug use disorder as defined by HUD
- 144/523 (27.5%) individuals have a mental health disorder as defined by HUD
