

INVITATION TO BID #2017-17 Carli Creek Enhancement and Water Quality Project ADDENDUM NUMBER 3 June 7, 2017

On May 11, 2017, Clackamas County ("County") on behalf of Clackamas Service District No. 1 ("CCSD#1) published Invitation to Bid #2017-17 ("BID") and on May 15, 2017 published Addendum #1, and on June 01, 2017 published Addendum #2. The County has found that it is in its interest to amend the BID through the issuance of this Addendum #3. Except as expressly amended below, all other terms and conditions of the original BID and subsequent Addenda shall remain unchanged.

1. Add to Special Provisions Section 00235.02:

- a. Clean fill deposited on the Agency provided site may not include concrete, asphalt and brick. ODOT 2015 Standard Sections 330.12 and 330.13 define borrow material and selected general backfill material which describe what is acceptable to deposit on the site.
- b. See ODOT 2015 Standard sections 330.42 and 330.43 for placement requirements associated with this location.
- c. A grading plan and grading permit will be needed for the placement of the 20,000 cubic yards of fill on the Capps compost site per County Excavation and Grading Ordinance Section 9.03 (http://www.clackamas.us/code/).

2. Add the following to Section 00330.17 Quality Control (from ODOT 2015 Standard Secitons 00165.35 which is not part of our standard specifications):

Nonfield-Tested Materials – The Contractor shall furnish Materials meeting Specifications, along with all Materials Conformance and Quality Compliance Documents.

(a) **Test Results Certificate** - The Certificate shall:

- Be from the manufacturer verifying that the Material furnished has been sampled and tested and the test results meet the Specifications.
- Include, or be accompanied by, a copy of the specified test results (ODOT, AASHTO, ASTM, UL or other).
- Identify the testing agency and the representative responsible for the test results.
- Permit positive determination that Material delivered to the Project is the same Material covered by the test results.
- Be delivered to the Engineer with the shipment of the material.

(b) Quality Compliance Certificate - The Certificate from the manufacturer shall:

- Verify that the Material meets the Specifications, and identify by number the specified test methods used, (ODOT, AASHTO, ASTM, UL, or other)
- Permit positive determination that Material delivered to the Project is the same Material covered by the certificate,
- Be delivered to the Engineer with the shipment of the Material, or be an identification plate or mark, decal, sticker, label, or tag attached to the container or Material,

- **(c) Equipment List and Drawings** These consist of lists of proposed Equipment and Materials, such as:
 - Shop drawings
 - · Material lists
 - Equipment lists
 - · Catalog description sheets
 - Manufacturer's brochures

Submit these lists to the Engineer for review of conformance with the Specifications.

- 3. Submittal List has been added Please see attached Carli Creek Enhancement and Water Quality Design Project- Submittal List dated June 1, 2017.
- 4. Piezometer readings from geotechnical engineer have been updated (See Attachment 1, dated June 6, 2017, attached and hereby included by reference).
- 5. Delete Special Provision Section 00202.04 "Milestones" and Special Provision Section 00202.03 "Completion Times". Please note Key Dates listed in the Public Improvement Contract.
- 6. Remove and replace the Bid Tab with the attached Bid Tab titled *Addendum #3 Bid/Fee Sheet*. (Note the following updated quantities):
 - a. Item No. 11 Removal of Curbs: 810 L.F
 - b. Item No. 13 Asphalt Pavement Sawcutting: 1,018 L.F.
 - c. Item No. 38 Trench Resurfacing: 1,200 S.Y.
 - d. Item No. 40 Concrete Curb, Standard Vertical Curb: 810 L.F.
 - e. Item No. 51 Soil Testing: Removed from Bid
- **7.** Add the following to the Supplemental General Conditions:

The following sections are added to Section D.2- Delays:

D.2.4 DAMAGES FOR DELAY – LIQUIDATED DAMAGES

- (a) It is imperative that the Work in this Contract reach Substantial Completion by June 30, 2019, and as further required in the Plans and Specifications and Section 5 of the Contract to ensure Clackamas Service District No. 1 and Clackamas County Development Agency can meet the mitigation wetland permit requirements. The Contractor represents and agrees that the Substantial Completion date is reasonable, that it can meet the Substantial Completion date, and it has taken into account in its Offer the requirements of the Contract Documents, the location, the time allowed for the Work, local conditions, weather, availability of materials, equipment, and labor, and any other factor which may affect performance of the Work.
- (b) If the Contactor fails to achieve Substantial Completion as specified above, then the Contractor and Owner agree that it would be extremely difficult to ascertain the

damages incurred by Owner for the Contractor's failure. Therefore, Owner and the Contractor agree that in lieu of actual damages for delay, the Contractor shall reimburse Owner a stipulated sum of nine hundred dollars (\$900.00) per day for each and every calendar day of delay until Substantial Completion. The Contractor further agrees the stipulated sum is not a penalty.

Likewise, if the Work does not reach Final Completion by July 30, 2019, as identified in Section 4 of the Contract, then the Contractor shall owe to the Owner, not as a penalty but as liquidated damages, the sum of one thousand two hundred and fifty dollars (\$1,250.00) per day for each and every calendar day of delay until Final Completion

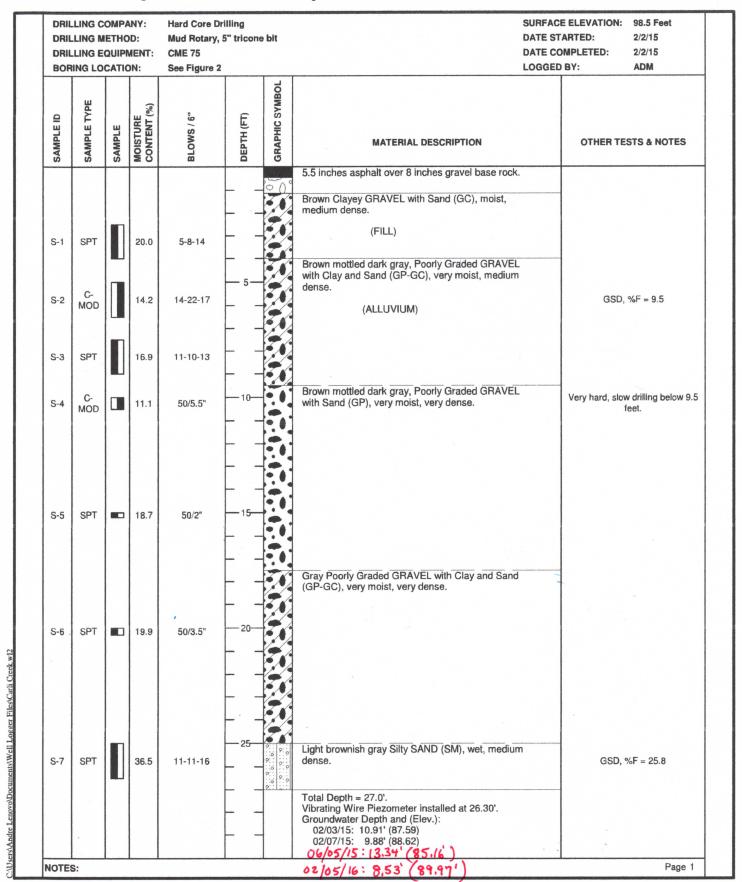

End of Addendum #3

Carli Creek Enhancement and Water Quality Design Project - Submittal List Herrera Project Number 14-05930-000 June 1, 2017

June 1, 2017 Section	ODOT 2015/Special Provisions	Submittal	Requirements	Schedule
00202.01	Special Provisions	Schedule of Working Hours	Mobilization, timing of work, weather-dependent work, contingency days, milestones, substantial completion, punch list	Must be approved prior to mobilization.
			Include specific Traffic Control Measures (TCMs) per Section 00225.01 and quantities and duration of all TCMs.	5 calendar days before pre-
00225.05	Special Provisions	Traffic Control Plan	Describe any temporary lane closures or access disruptions. Contractor's TWMP shall include at least the following information:	construction conference
			The sequence and schedule for dewatering and re-watering.	
			 How the work area will be isolated from the active stream flow including upstream flow and downstream backwater. 	
			How the stream flow will be routed and conveyed around the isolated work area.	
			How high storm flows will be conveyed through the site, should they occur. How the isolated work area will be de-watered.	
			How any pumped water will be treated before it is discharged downstream.	
			 How energy dissipation will be provided at all bypass flow outlet locations. Discuss water management for all construction stages. 	10 Calendar Days before
			A list of on-site backup materials and equipment. Calculations of water withdrawal pump capacity (if part of the plan).	beginning work in regulated work areas, submit stamped
	Special provisions		Calculations of gravity bypass pipe capacity (if part of the plan).	working drawings of a Contracto
00245.00	00245.03	Temporary Water Management Plan	Description of proposed means to anchor bypass pipe in place (if part of the plan). Contractor shall develop an Erosion and Sediment Control Plan (ESCP) and submit to Agency	developed TWMP
			as required for the NPDES 1200-CA permit. Update Erosion and Sediment Control Plans and	
			Details included in the Drawings based on Contractor's proposed construction sequence and means and methods of construction. Submit the following:	
	Special Provisions		Proposed ESCP showing all ESC work and quantities of all work.	10 calendar days before pre-
00280.04	00280.04	Erosion and Sediment Control Plan Qualifications of Erosion and Sediment Control	Implementation schedules for the ESCP based on each phase of the Contractor's work.	construction conference 10 calendar days before pre-
00280.06	ODOT 00280.06	Manager (may be included in ESCP)	Conform to specs	construction conference
00280.16 00280.16	ODOT 00280.16 ODOT 00280.16(d)	Sediment Fence Inlet Protection, Type 3	"Level B" documentation per 02320.10(c) for geotextile Provide documentation that inlet protection device is on ODOT's QPL	
			Clean, durable, open graded angular aggregate sized between 4 inches and 1 inch with less than 5 percent by weight	
00280.16 00280.16	ODOT 00280.16(a) ODOT 00280.16(a)	Aggregate for Construction Entrance Geotextile for Construction entrance	passing the No. 4 sieve. "Level B" documentation per 2320.10(c)	
00280.16	ODOT 00280.16(j)	Floating turbidity barrier	Product information/shop drawings for: Turbidity curtain, bulk bags, pit run (to fill bulk bags), handles	
00280.30	Special Provisions 00280.30	Erosion and Sediment Control Manager	Provide qualifications for Certified Erosion and Sediment Control Lead (CESCL).	10 calendar days before pre- construction conference
00280.41	ODOT 00280.41	High Vis. Fence	Product information for high vis. Fence	2220 delion conference
00280.41	ODOT 00280.41 (c)	Stockpile Cover	Product information for stockpile cover materials/methods	Submit daily log form to
00290.30	Special provisions 00290.30(a)(8).	Turbidity Monitoring Daily log	Daily log form	Engineer for approval
				Maintain daily logs; submit to
	Special provisions		Document all turbidity monitoring results including date, time, and location on a daily log form approved by the	Engineer weekly when working
00290.30	00290.30(a)(8). Special Provisions	Turbidity Monitoring Daily log	Agency. Provide the Engineer with all Permit applications, permit fees, start cards, well reports, bonds, and letters of credit	in regulated work areas Within 48 hours of completing
00298.03	'00298.03	Well Preservation and Abandonment	required by the Oregon Water Resources Department.	the work
			Provide survey drawing files and the Civil 3D surface to the Engineer. Notification, control, survey crew qualifications, and preservation of markers and monuments shall conform with the current edition on the date of Advertisement, of	
	Special Provisions		the ODOT "Construction Surveying Manual for Contractors". This manual is available on the web at:	
00305.00	00305.00	Construction Survey Work	http://www.oregon.gov/ODOT/HWY/GEOMETRONICS/Pages/documents.aspx The Soils Management Plan shall include the following:	
			A map verifying locations, types, depths, and estimated quantities of soils for salvage	
			 A map indicating locations for proposed stockpilling, methods and locations for characterization per Section 00330.05 	
			Schedule with proposed sequence of construction	
			 Qualifications of Quality Control Personnel who will be performing soil density testing and fines testing 	
			Contingency measures for rain days	
			Description of handling activities that will ensure salvaged soils maintain accordance with the properties in the respective sections of these Special Provisions:	
			(1) Structural fill per Section 00330.19(a)	
	Enocial provisions		(2) General Fill per Section 00330.19(b)	20 days prior to start of
00330.06	Special provisions 00330.06	Soil Management Plan	(3) Topsoil per Section 00330.07 (4) Low Permeability Soil Lining Material per Section 00330.18 (a)	20 days prior to start of excavation
00330.18	Special Provisions 00330.18(a)	Segregation and Placement of Salvage Low Permeability Soil Lining Materials	Submit test results for fines content testing (ASTM D1440) to the Engineer and obtain written approval.	Deinate element of fill
00330.16	ODOT 00405.40 and	remeability 3011 Liming Materials	Submit test results for times content testing (ASTM D1440) to the Engineer and obtain written approval.	Prior to placement of fill
00405.00	Special Provisions	Transk Sussission Daddies and Daddill	1. 00405.40 Qualifications for Quality Control Personnel	
00405.00	00405.41(f)	Trench Excavation, Bedding and Backfill	00405.41(f) Trench protection plan. Submit within 30 days of the effective notice to proceed.	
			a. Design documents, including detailed written description of excavation support system to be used, including	
			materials, required equipment, work sequence, and work schedule. d. Design drawings and calculations prepared, stamped, dated and signed by a licensed professional engineer.	
			Calculations shall demonstrate the integrity of the proposed support system to withstand ground, groundwater, and	
			construction loads. Drawings shall include dimensions, minimum section properties, locations of existing structures, utilities, right-of-way easements.	
	ODOT 00405 40 '		i. Methods and procedures for installing and removing trench protection system	
	ODOT 00405.40 and Special Provisions		j. Shop drawings and manufacturer literature for major equipment and installation systems I. Confirmation of trench protection with dewatering plan.	
00405.00	00405.41(f)	Trench Excavation, Bedding and Backfill		
			000405.43 Dewatering Plan. Contractor shall prepare a dewatering plan that is stamped and signed by a licensed	
			1. UUU4U5.43 Dewatering Plan. Contractor shall prepare a dewatering plan that is stamped and signed by a licensed professional engineer. Submit within 30 calendar days of the effective notice to proceed. Include:	
			a. Qualifications of well driller and dewatering system designer	
			b. Drawings and design calculations for dewatering system c. Coordination with trench protection designer	
			d. Evaluation of need for settlement monitoring and settlement monitoring design, if appropriate	
			e. Number, location, size, and depth of all dewatering wells and other dewatering system components f. Capacities of pumps and standby equipment	
			g. Detailed description of the dewatering schedule, sequence, operation, maintenance, and abandonment procedures	
			h. Estimated dewatering system discharge flow rates i. Proposed method of dewatering water treatment and disposal. If storage and disposal at the Site are proposed,	
			provide design for all conveyance, energy dissipation, sediment control, and other measures to ensure that	
	Special Provisions		dewatering treatment and disposal will be consistent with the environmental protection requirements of Section 00290.	
00405.00	000405.43(c)	Dewatering Plan		
			 Source and product information for trench foundation, bedding, pipe zone material, and trench backfill. Include technical data, gradation data, and mix designs if applicable. 	
			a. Aggregates	
			b. Crushed gravels c. Granular backfills	
			d. Controlled density fill including mix designs	
			e. Other applicable materials 1. Testing information materials including:	
			a. Granular backfill	
			b. Controlled density fill c. Other applicable materials	
00405.00	ODOT 00405.00	Trench and Backfill Materials	c. Other applicable materials

Identify all contractor activities, hazardous substances used and wastes generated. Describe how hazardous substances and wastes will be stored, used, contained, monitored, disposed of and documented. Include pollution prevention, spill response, waste reduction, dust prevention, off site tracking prevention, washout facility design, vehicle and equipment	
03020.10		Compost	Test data, including the date and name of the test procedure. Demonst technical data sheet: For the compost component of the blended soil, provide a compost technical data sheet from the vendor. The analysis and report must conform to the sampling and reporting requirements of the US Composting Council Seal of Testing Assurance (STA) program. The analysis shall be performed and reported by an approved independent STA program laboratory and be no more than 90 calendar days prior to the date of the submittal. C. Up to two 5-gailon buckets of the blended material, as requested. Include the following information in the PCP: Identify a professional on-call spill response team. Identify all contractor activities, hazardous substances used and wastes generated. Describe how hazardous substances and wastes will be stored, used, contained, monitored, disposed of and documented. Include pollution prevention, spill response, waste reduction, dust prevention, off site tracking prevention, washout facility design, vehicle and equipment fueling and maintenance procedures, employe training and emergency contact	
03020.10		Compost	Test data, including the date and name of the test procedure. b. Compost technical data sheet: For the compost component of the blended soil, provide a compost technical data sheet from the vendor. The analysis and report must conform to the sampling and reporting requirements of the US Composting Council Seal of Testing Assurance (STA) program. The analysis shall be performed and reported by an approved independent STA program laboratory and be no more than 90 calendar days prior to the date of the submittal. c. Up to two S-gallon buckets of the blended material, as requested. Include the following information in the PCP: Identify a professional on-call spill response team. Identify all contractor activities, hazardous substances used and wastes generated. Describe how hazardous substances and wastes will be stored, used, contained, monitored, disposed of and documented. Include pollution prevention, spill response, waste reduction, dust prevention, off site tracking prevention, washout facility design, vehicle and equipment fuelling and maintenance procedures, employee training and emergency contact information.	At least 14 work days in advance of installation

Include the following information in the PCP: Include the following information wastes will be stored, used, contained, monitored, disposed of and documented. Include pollution prevention, spill response, waste reduction, dust prevention, off site tracking prevention, washout facility design, whelied and equipment fueling and maintenance procedures, employee training and emergency contact information. Include the waste determination results from 00290.20(c-1). Provide reuse, recycle, and disposal options, the reason for selecting that alternative, and estimated quantities for each reuse, recycle, and disposal option. Include or refer to the SPCC plan and the hazardous waste contingency plan, if required. Include scaled site plans showing locations for hazardous substance storage, spill response equipment, communications equipment and fire suppression equipment. A "Pollution Control Plan Contractor Packet" is available from the Agency. Sk Submit a schedule to complete all work within the regulated work area within the in-water work period include or describe the proposed methods for the following: Work progress schedule according to 01040.19(g) Topsoil and/or Wetland Topsoil approvals according to 01030.42(a) Emergency contact person, incl	of installation 10 days before preconstruction conference At least 10 days prior to the
00290.30(b)	05020.10 ODOT 00290.30(b) Special provisions	Pollution Control Plan (PCP) Protection of Fish and Fish Habitat- Regulated Wo	Test data, including the date and name of the test procedure. Compost technical data sheet from the compost component of the blended soil, provide a compost technical data sheet from the wendor. The analysis and report must conform to the sampling and reporting requirements of the US Composting Council Seal of Testing Assurance (STA) program. The analysis shall be performed and reported by an approved independent STA program laboratory and be no more than 90 calendar days prior to the date of the submittal. C. Up to two S-gallon buckets of the blended material, as requested. Include the following information in the PCP: Identify a professional on-call spill response team. Identify all contractor activities, hazardous substances used and wastes generated. Describe how hazardous substances and wastes will be stored, used, contained, monitored, disposed of and documented. Include pollution prevention, spill response, waste reduction, dust prevention, off site tracking prevention, washout facility design, which and equipment fueling and maintenance procedures, employee training and emergency contact information. Include the waste determination results from 00290.20(c-1). Provide reuse, recycle, and disposal options, the reason for selecting that alternative, and estimated quantities for each reuse, recycle, and disposal option. Include or refer to the SPCC plan and the hazardous waste contingency plan, if required. Include scaled site plans showing locations for hazardous substance storage, spill response equipment, communications equipment and fire suppression equipment. A "Pollution Control Plan Contractor Packet" is available from the Agency. The Material submittals according to 00180.19[g]. Topsoil and/or Wetland Topsoil approvable from the Agency.
