

STILL HAVE SOME QUESTIONS ABOUT THE COVID-19 VACCINES?

The vaccines **cannot** give you COVID-19

All of the authorized vaccines have undergone transparent and thorough testing and trials with participants of different ages, genders, races and ethnicities to determine their efficacy.

None of the vaccines contain live virus and they cannot change your DNA.

SIDE EFFECTS

Side effects, like a sore arm, headache, or tiredness, are very common and should go away in 1–2 days. Serious side effects are very rare.

VACCINE SAFETY

The vaccines were developed by health and medical experts to safely prevent you from getting severely sick. They do not contain microchips and cannot be used to track you.

INCREASED PROTECTION

All of the available vaccines provide strong protection against severe disease and hospitalization. By getting a vaccine, you are helping to protect yourself and those close to you.

PROVIDED FREE OF COST

The vaccine is provided to you free of charge. You do not need health insurance and you do not need a social security number. Just wear a mask and bring a photo ID if you have it.

You can find more information about COVID-19 vaccines on the CDC's website. www.cdc.gov
